*COOLSHIRT Systems rehab products meet
NFPA 1584 requirements.*

6 Person Rehab System

3001-0004

With 6 individual ports, this system is ideal for keeping firefighters, EMT, and other emergency staff cool.

Simple to set up (direct-wired 110V), this ice and water based system includes 6 AVA vests, hoses, a rolling cart and everything needed to get you started.

Built around a 60 quart heavy-duty cooler to ensure that you stay cool for a longer period of time, the cooler incorporates a water port panel that allows for up to 6 connections. Special order 12 person system also features a dual pump for enhanced efficiency

Standard Rehab System

3001-0003

Quickly return vital signs to normal and rehab up to 6 first responders simultaneously.

Easy-to-use system meets NFPA 1584 standards and works with ice and water (direct-wired 110V system)

Consistent use of the system will help keep crews safe, mentally alert and productive by helping to maintain a safe core body temperature while performing their tasks.
